

New Courses - Introduction to Python and Minecraft Mods with JavaScript

For the Christmas Holidays we will be adding two (2) new courses to our ever growing list.

Introduction to Python is a great starting point for learning the Coding language, Python. Learn how to create games and build programs all with Python.

Minecraft Mods with JavaScript has you creating houses and controlling worlds in Minecraft using the Coding language JavaScript.

**Each Course runs 2 Days,
9 am to 3 pm**

Intro to 3D Printing

10 Jan 2017 – 11 Jan 2017

Intro to Game Design

12 Jan 2017 – 13 Jan 2017
(Level 1,2)

16 Jan 2017 – 17 Jan 2017
(Level 3,4)

Game Design (Int)

16 Jan 2017 – 17 Jan 2017

Intro to Coding

19 Jan 2017 – 20 Jan 2017

Minecraft Mods with JavaScript

19 Jan 2017 – 20 Jan 2017

Hacking Minecraft

23 Jan 2017 – 24 Jan 2017

Introduction to Python

23 Jan 2017 – 24 Jan 2017

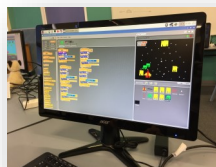

Courses will be held at
New Town High School
6 Midwood St, New Town

**Enrolments close
5th January 2017**

Christmas Holidays Special.

Everyone loves free stuff! Enrol your child and finalise all payments before the end of the year (31/12/2016) and receive a **free Coder College Cap**.

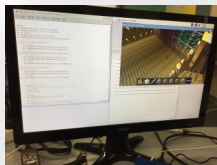

Introduction to Coding

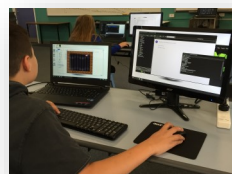

A great starting course for those with no previous (or limited) experience in Coding. If they have never coded before, never used Scratch then this is the course for them.

Hacking Minecraft

For kids who have done some coding before and have a basic understanding of how Coding works. This course will have them creating games, building bridges and changing worlds through the language of Python.

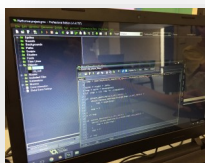

Introduction to Game Design

Designed for kids who have done some coding before, this course will have them making sprites, scrolling backgrounds, collision events, and making games in no time.

Game Design (Intermediate)

Further control your own game creations through the use of code. Step away from the predetermined settings and edit your game design in more detail, creating smooth movements and complex game play.

Introduction to 3D Printing

Designed for kids interested in creating 3D designs and printing them, this course will have them creating and customising amazing 3D objects and then having the opportunity to watch them printing before taking them home.

Introduction to Python

Learn to code with one of the most popular computer languages, Python.

A powerful language which is used by sites such as YouTube, Instagram and Pinterest.

Minecraft Mods with JavaScript

Learn the coding language JavaScript through the creation of mods for Minecraft. Learn a powerful coding language and control worlds through this exciting course.

**Coder College t-Shirts also
available for the Christmas
Holiday courses at \$25 each.**

**Add one to your enrolment to
ensure you don't miss out.**
