

Busy times in 2B!

Earlier this term we visited the Sustainability Centre in Mt Nelson.

We learnt some very important facts about water and what we can do to conserve it.

We also had a great time creating dams and waterways in the loose parts area.

NAIDOC Week was a time for learning about Aboriginal culture. We danced and made damper on the camp fire.

As part of our water study, we have conducted an experiment to see how transpiration works in the water cycle.

This week we are learning all about Fire Safety.

This is what a fire fighter looks like when they have their protective gear on. Their breathing sounds very funny.
