

Prep A had a wonderful time learning about the Tokyo Olympics. Each day as part of their maths program they collected data by tallying the medal count of Australia and sharing their thinking about what the data was saying. Below is a summary of their findings.

We won 46 gold medals altogether. (Kayto)

We won 17 gold. (Isabella)

We had 7 silver medals. (April)

We had 22 bronze. (Sophie)

The United States won the most medals. (Winter)China came second. (Lottie)

Prep A also combined with Prep B one afternoon and participated in their very own 'Mini Olympics'!

The children marched in countries with flag bearers leading the way. Nell and Lottie lit a 'real cauldron' to start the games. The children all participated in a variety of sports. There were running races, rhythmic gymnastics, soccer, basketball, hurdles, balance beams and vortex throwing activities. At the completion of the games there was a medal presentation where a gold medal was given to courageous and fair play

participants. It was no surprise to the spectators that **all** Preps deserved a gold medal!!
