

In Kinder B we have been exploring all things about dinosaurs. Here are some things we know about dinosaurs:

- A T-Rex could snap its jaws.
- A T-Rex was a carnivore. It only ate meat.
- A Brachiosaurus grew to be very large. It had a long neck so it could reach the leaves on tall trees
- There was a dinosaur that was smaller than a chicken.
- Pterodactyls could dive under water to catch fish to eat.

We even made our very own dinosaur fossils using clay and skeleton models.
